

## **HD Processing Forum**

### ***What is “HD Processing Forum”?***

HD Processing Forum has been operated by a group of companies who are promoting the market development initiatives related to the HD (High Definition) video & image processing applications.

The activities of HD Processing Forum include:

#### Publications

HD Processing Forum, online media affiliated with Nikkei BP, widely publishes reports and articles on technology & market trends, specific breakthrough technologies, emerging business opportunities, product announcement, and other key topics related to HD video & image processing applications.

HD Processing Forum may facilitate the market communications for the participating companies through the publications.

#### Conference Events

HD Processing Forum organizes the conference events to facilitate the opportunities to exchange the view on the technology & market trends related to HD video & image processing applications.

The participating companies are invited to make announcements on their product and service activities.

#### Collaboration Meetings

HD Processing Forum facilitates the meeting opportunities for collaborative discussion among participating companies.

Such collaboration meetings will be set up by HD Processing Forum initiative or the request by participating companies
